## **Chapter 2: Installation**

## .NET Framework Installation

Before you can use L2Divine, the one component which must be met is Microsoft .NET Framework version 3.5 or above. You can check to see if you already have the .NET Framework installed by clicking Start on your Windows desktop, selecting Control Panel, and then double-clicking the Add or Remove Programs icon. When that window appears, scroll through the list of applications. If you see Microsoft .NET Framework listed, the latest version is already installed and you do not need to install it again. If not found that mean you need to install it, you can download it from Microsoft, after download complete, Install it and click next until installation finish.

Note! URL for download: <http://download.microsoft.com/download/6/0/f/60fc5854-3cb8-4892-b6db-bd4f42510f28/dotnetfx35.exe>

Microsoft .NET Framework 1.1	
Microsoft .NET Framework 1.1 Hotfix (KB928366)	
Microsoft .NET Framework 2.0 Service Pack 1	Size 185.00MB
Microsoft .NET Framework 3.0 Service Pack 1	Size 245.00MB
Microsoft .NET Framework 3.5	Size 25.88MB

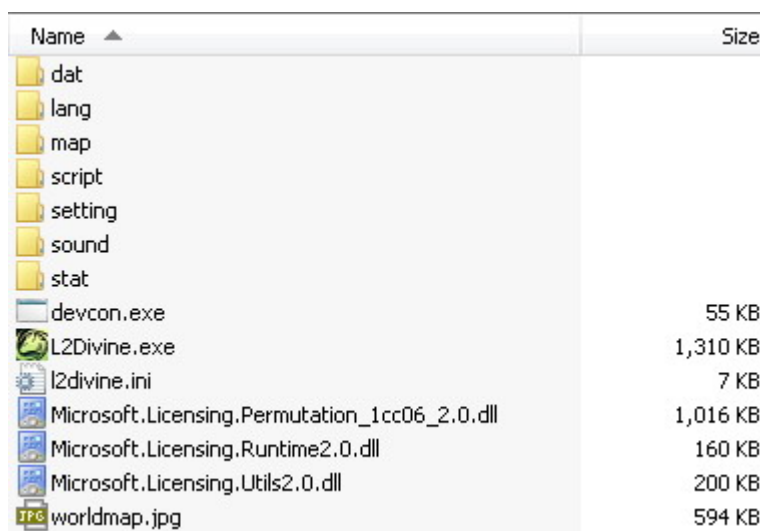

.NET Framework listed in your computer

## L2Divine Installation

After completely install Microsoft .NET Framework 3.5 it's time to install L2Divine. Installing L2Divine is simply by downloading latest released from download section and then unzips it to your local hard disk. You can launch L2Divine by double-clicking on L2Divine.exe.

## Radar Map and Language Installation

Radar Map and Language are not included with L2Divine installation file. You can download it separately at download section. After download the latest file, unzip into L2Divine\map and L2Divine\dat folder respectively. Your installation folder should look like figure below.

Name	Size
dat	
lang	
map	
script	
setting	
sound	
stat	
devcon.exe	55 KB
L2Divine.exe	1,310 KB
l2divine.ini	7 KB
Microsoft.Licensing.Permutation_1cc06_2.0.dll	1,016 KB
Microsoft.Licensing.Runtime2.0.dll	160 KB
Microsoft.Licensing.Utils2.0.dll	200 KB
worldmap.jpg	594 KB

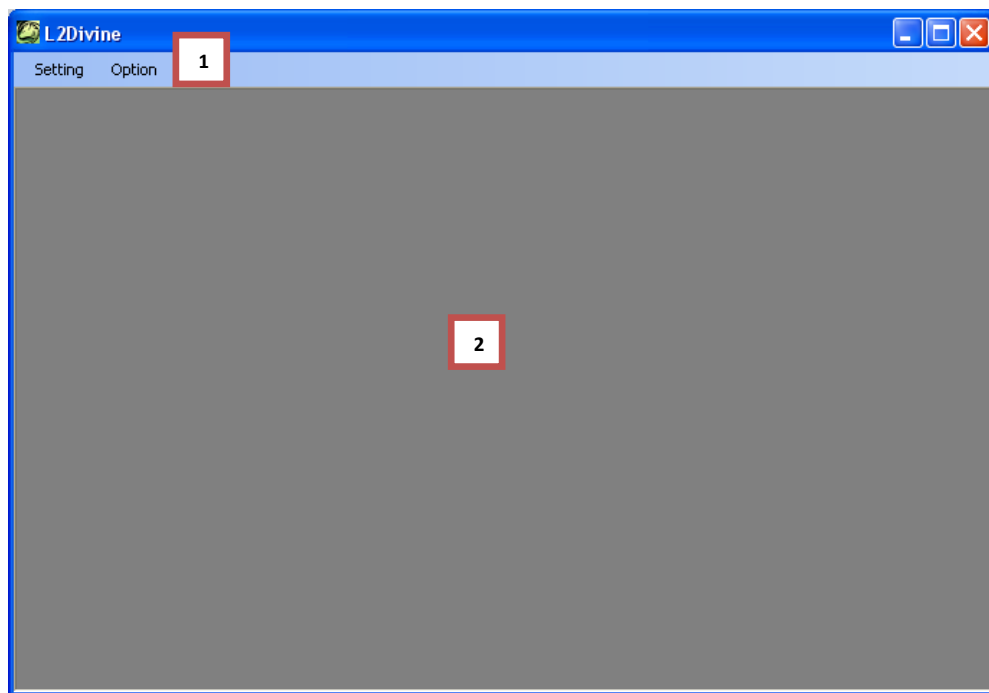

## **Chapter 3: Interface**

In order to properly usage L2Divine, you must first understand the screen and interface. Start up L2Divine by double clicking at L2Divine.exe. L2Divine window will progress to loading resources at the moment and you will see main screen appear.

## Main screen

Main screen include:

Sauron	Enemy
Frodo	Friend
Centurio	ClanWar

Name  Type ClanWar ▼ Add Delete

## Combat

Enable you to set command and condition for battle.

### Condition > Fight

The screenshot shows the 'Fight' tab in a game's settings menu. The tab is selected, and the following options are visible:

- ☒ I'm combat leader
- ☐ Battle after login
- ☒ Timeout 10 sec
- ☒ Auto attack aggressive mob
- ☐ Auto counter attack
- ☐ Pickup item in hunting area
- ☐ Change to nearest target
- ☐ Auto attack high priority mob
- ☒ Not attack mob outside area
- Battle Mode: Normal (dropdown menu)
- ☐ Fight delay 0 sec
- ☐ Loot Item & Mob
- ☐ Sweep & Sow before attack
- ☒ Pickup item range 500
- ☐ Pickup item before attack
- ☐ Change target when other player select mob
- ☐ Accept revive from other player
- ☒ Auto /Unstuck

Resting

Sit when ☐ HP < 0 % ☐ MP < 0 % ☐ Use relax skill

Stand when ☐ HP > 0 % ☐ MP > 0 %

When not found mob (Leader Only)

☒ Wait ☐ Sit ☐ Change hunting area ☐ Back to center

- I'm combat leader: Set character to be team leader and make decision what team should do such as select target or pickup item.
- Battle Mode: Select Normal, Hunting or Siege mode. Each mode has different battle style. Normal mode will fight mob at current location and only required hunting area. Hunting mode will draw mob to battle area before fighting and required both Hunting and Battle area. Siege mode allows you to attack NPC. See more at Battle Setting.
- Battle after login: Enable you to start battle after login.
- Fight Delay: Delay time in second before target to new mob.

Fishing Location    My Loc Add Delete

Move Location    My Loc

For instance, Figure below is correct setting for fishing on multiple locations. When start fishing, your character will action following:

1. Move to nearest "Moving location" and forward to "Fishing location". (Location 1 in figure)
2. Fishing start here until change area time reaches. Your character will move back to "Moving location 1" then move forward to "Moving location 2".
3. Move forward to "Fishing location 2" and start fishing again!

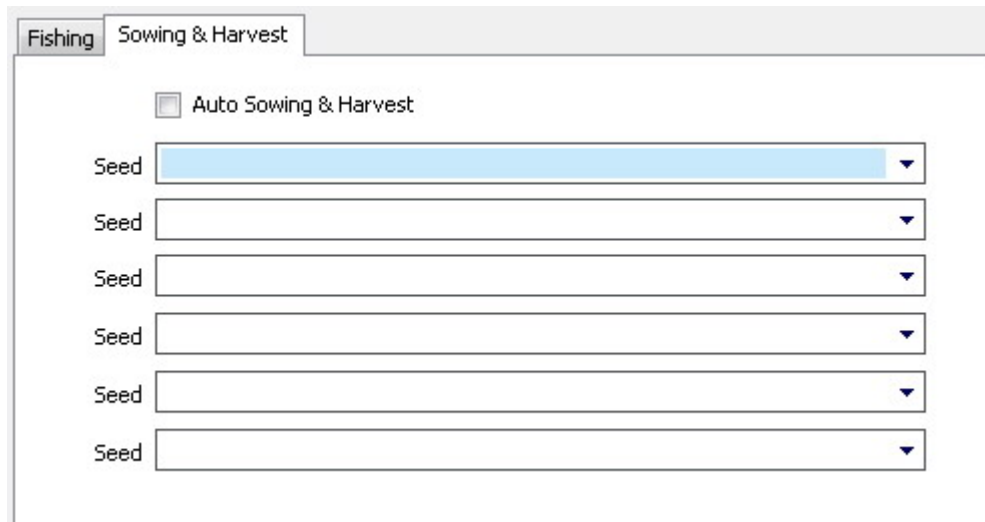

## Manor

Enable you to sowing in battle.

- Auto Sowing & Harvest: Enable sowing in battle.
- Seed: Seed type to sow.

Note! If you want to spoil, your dwarves should sowing to protect corpse disappear after sweeper before using harvester tool.

The image shows a screenshot of a game's settings menu, specifically the 'Sowing & Harvest' tab. The window has two tabs at the top: 'Fishing' and 'Sowing & Harvest'. The 'Sowing & Harvest' tab is active. Inside the window, there is a checkbox labeled 'Auto Sowing & Harvest' which is currently unchecked. Below this checkbox, there are six rows, each consisting of the word 'Seed' followed by a dropdown menu. The first dropdown menu is highlighted with a light blue background, while the others are white. Each dropdown menu has a small downward-pointing arrow on its right side.

## Messaging Control

Enable you to response skill on other player via whisper message.

- Name: Requester name
- Message: Whisper message
- Skill: Response skill

The screenshot shows a window titled "Response". Inside the window, there is a table with three columns: "Name", "Message", and "Skill". The table is currently empty. Below the table, there are three input fields: "Name" (a dropdown menu), "Message" (a text box), and "Skill" (a dropdown menu). To the right of these input fields are two buttons: "Add" and "Delete".

## Other

- Show target LV and HP in IG mode: Give you target information (Level and HP) when selecting mob in IG mode.
- Auto start script after login: Auto starts script after login to game.
- Force use skill: Allow you to force use skill (Like press CTRL key)
- Auto save log before logout: Auto save log before your character logout
- Auto recommend: Allow you to recommend player after enter world.

**Other**

☐ Show target LV and HP in IG mode

☐ Auto start script after login

☐ Force use skill

☒ Auto save log before logout (Full IG mode only)

☐ Auto recommend

## **Chapter 4: Battle Setting**

## Battle Mode

There are 3 types of battle style in L2Divine, Normal, Hunting and Siege mode. Normal mode will fight mob at its location. Hunting mode will draw mob to battle area before fight. Siege mode will give you a chance to fight with NPC.

### Normal Mode

As mention above, this mode will fight mob at its location so both leader and follower will move together in battle. The way to enable your character in normal mode:

1. Select battle mode to Normal mode. (Combat > Condition > Fight > Battle Mode)
2. Leader only: Choose hunting areas by giving hunting location and range (Com > Condition > Area > Hunting). You can see giving area as red circle/rectangle in virtual map.
3. Follower only: Select leader name to lead battle. (Team > Leader/Follower > My Leader is)
4. Set command and other condition then press "Battle Start"

## Hunting Mode

In this mode, Leader and Follower will have different action:

- Leader: Leader will find nearest mob in hunting area. After locked by mob (If target is not aggressive type, your character will attack it once), leader will draw mob back to battle area and start to fight when reach.
- Follower: Follower will wait at battle area and do not action on (Attack, Heal and Buff) any target outside an area.

The way to enable your character in hunting mode:

1. Select battle mode to Hunting mode. (Combat > Condition > Fight > Battle Mode)
2. Leader only: Choose hunting areas by giving hunting location and range (Com > Condition > Area > Hunting). You can see giving area as yellow circle in virtual map.
3. Choose battle areas by giving battle location and range (Com > Condition > Area > battle). You can see giving area as red circle in virtual map.
4. Set command and other condition then press "Battle Start"

## Command

In order to battle you must set command. Command is a set of action grouping to Attack, Heal, Buff, Debuff, Pet Attack and Pet Assist.

**Combat > Command**

Attack

Heal

Buff

Debuff

Pet Attack

Pet Assist

## Attack

Command attack is action for attack mob. Execute in order and restart when targeting to new mob.

- Attack By: Select Attack (Melee) or Skill.
- Attacker Condition 1: Your HP, MP, CP (%), Soul (Unit) and Force (Unit) condition
- Attacker Condition 2: Same as condition 1 (Optional)
- Range: Distance between you and target to attack. Looking for skill range at Status > Skill.
- Shot: Select shot to use.
- Repeat: 1 time (Do only 1 time and ignore for result), Until success (Repeat until skill result success) and Until target die.
- Runaway: Runaway range after launch skill.
- Mob No: Number of surrounded mob.
- Mob HP: HP (%) of mob.
- Target: Attacking target. There are 2 types: Leader's Target (Attack on current leader target) and Targeting Team (Attack on other mob that under attack your team).
- R Hand: Equipping weapon/shield on your right hand.
- L Hand: Equipping weapon/shield on your left hand.
- NPC ID: Monster ID to attack with this command. If not specified, all mobs will be applied.

The screenshot shows a Windows-style dialog box titled "Command - Attack". It contains the following fields and controls:

- Attack By:** A dropdown menu.
- Attacker Condition 1:** A dropdown menu, a numeric input field with "0", and a "%" symbol.
- Attacker Condition 2:** A dropdown menu, a numeric input field with "0", a "%" symbol, and the text "(Optional)".
- Range:** A numeric input field.
- Shot:** A dropdown menu.
- Repeat:** A dropdown menu.
- Runaway:** A numeric input field.
- Mob No >:** A numeric input field.
- Mob Hp:** A dropdown menu, a numeric input field, and a "%" symbol.
- Target:** A dropdown menu.
- R Hand:** A dropdown menu.
- L Hand:** A dropdown menu.
- NpcId:** A text input field.
- Buttons:** "OK" and "Cancel" buttons at the bottom.

## Example for Bounty Hunter, Fortune Seeker

### 1. Spoil

Command - Attack

Attack By: Spoil

Attacker Condition 1: HP > 0 %

Attacker Condition 2: 0 % (Optional)

Mob No >: 0

Mob HP: > 0 %

Target: Leader's Target

R Hand:

L Hand:

OK Cancel

### 3. Sleep

Command - Attack

Attack By: Sleep

Attacker Condition 1: MP > 20 %

Attacker Condition 2: 0 % (Optional)

Range: 300

Shot:

Repeat: Until success

Runaway: 300

Mob No >: 0

Mob HP: > 0 %

Target: Targeting Team

R Hand:

L Hand:

OK Cancel

## Example for Warder

### 1. Fallen Attack

The 'Command - Attack' dialog box for 'Fallen Attack' contains the following settings:

- Attack By: Fallen Attack
- Attacker Condition 1: HP > 0 %
- Attacker Condition 2: Soul > 0 % (Optional)
- Range: 40
- Shot: (empty dropdown)
- Repeat: 1 time
- Runaway: 0
- Mob No >: 0
- Mob HP: > 0 %
- Target: Leader's Target
- R Hand: (empty dropdown)
- L Hand: (empty dropdown)
- Buttons: OK, Cancel

### 2. Normal Attack

The 'Command - Attack' dialog box for 'Normal Attack' contains the following settings:

- Attack By: Attack [Normal]
- Attacker Condition 1: HP > 0 %
- Attacker Condition 2: (empty dropdown) > 0 % (Optional)
- Range: 40
- Shot: (empty dropdown)
- Repeat: Forever
- Runaway: 0
- Mob No >: 0
- Mob HP: > 0 %
- Target: Leader's Target
- R Hand: Tarbar
- L Hand: Round Shield
- Buttons: OK, Cancel

Note! This is just few examples. Create command that best with your battle style.

## Heal

Command heal is action for healing you and your teammate like Greater Heal, Resurrection and Recharge. Execute by condition.

- Target Name: Healing target. (Use "Self" to represent yourself and separate each name by comma)

Target Name: Pet

Pet MP > 5 %

Target Condition 1: HP <= 70 %

Action by Skill: Bright Heal

Action by Item:

Detection: ☒ Auto Detect

☐ Delay 0 sec

☒ Do not select target

OK Cancel

## Misc

Additional command to support your team

Attack Heal Buff Debuff Pet Attack Pet Assist Misc

☐ When 0 member of party, HP < 0 % use

☐ When 0 member of party, HP < 0 % use

☐ When 0 member of party, HP < 0 % use

## **Chapter 5: Trading Setting**

Trading is rich features of L2Divine. With multiple trade functions, make your trading very easy. Go to Preference > Trading to see function that L2Divine can do.

## Private Store

Enable you to set up private store like buying, selling and craft item.

### Shop Setting

- Shop after login: Allows you to setup private store after login
- Default shop: Select your default private store
- Reset shop every: Time (minute) to reset store
- Cycle item for Sell/Buy shop: Enable you to cycle item when store being reset
- Logout after shop empty: Allows you to logout when items sold out. (Sell shop only)
- Shop location: Location that your store will be setup. If not set, current location will be use.

### Item Setting

- Shop type: Allows you to set items of store
- Shop title: Allows you to set title of store
- Package Sell: Enable you to setup package sale (Store sale only)

The screenshot displays the 'Private Store' configuration window, which is divided into two main sections: 'Shop Setting' and 'Item Setting'.

**Shop Setting:**

- ☐ Start shop after login
- Default shop:
- ☐ Reset shop every  minute
- ☐ Cycle item for Sell/Buy shop
- ☐ Logout after shop empty
- Shop Location:

**Item Setting:**

- Shop Type:
- Shop Title:
- ☐ Package Sell

Name	Qty	Price
------	-----	-------

At the bottom, there is a form to add or delete items:

Item:  Qty:  Price:

## Item Creation

Enable you to create item automatically.

- Recipe: Display recipe include common and dwarven
- Qty: No of item to create
- M(%): MP limit
- Load(%): Weight limit
- Delay (Second): Creation delay time

Name	Qty <	MP(%) >	Load(%...	Delay(s)
------	-------	---------	-----------	----------

Recipe

Qty <  MP(%) >  Load(%) <  Delay (s)

Note! You can create item while battle or trading by press "Create" before "Battle Start" or "Trade Start" button.

## Marketplace Scan

Enable you to search item in player store.

- Start shop after scan complete: Allows you to setup private store after scan complete (Private store setup is required)
- Shop type: Allow you to select store type to scan.
- Rescan every: Time (minute) to rescan marketplace.
- Scan location: Range for scan (Multiple supported). If not set, your current location will be used at range 3,000.
- Preview: Enable preview of scan location in virtual map. Display as yellow circle.

Trading > Marketplace

Marketplace Auto Sell/Buy

Scan Setting

☐ Start shop after scan complete Shop Type All

☐ Rescan every 0 minute

Scan Location

☐ Preview

The way to enable your character in marketplace scan mode:

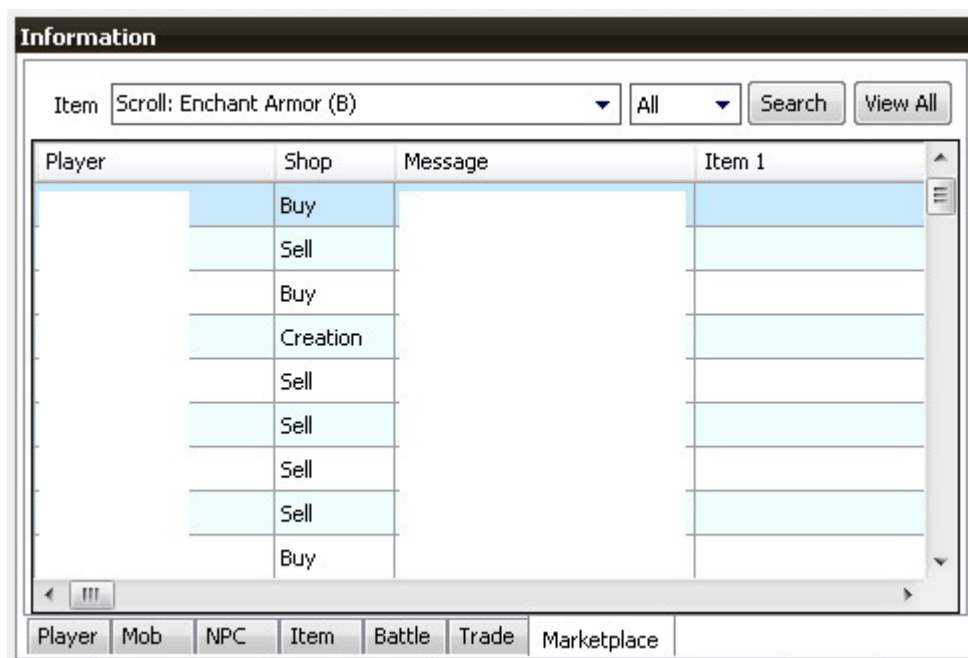

1. Giving scan range.

2. Press "Scan start" at control panel and wait until finish. (Your character will moving and progress message will display during scan)

3. Go to Information > Stat > Marketplace to see scan result.

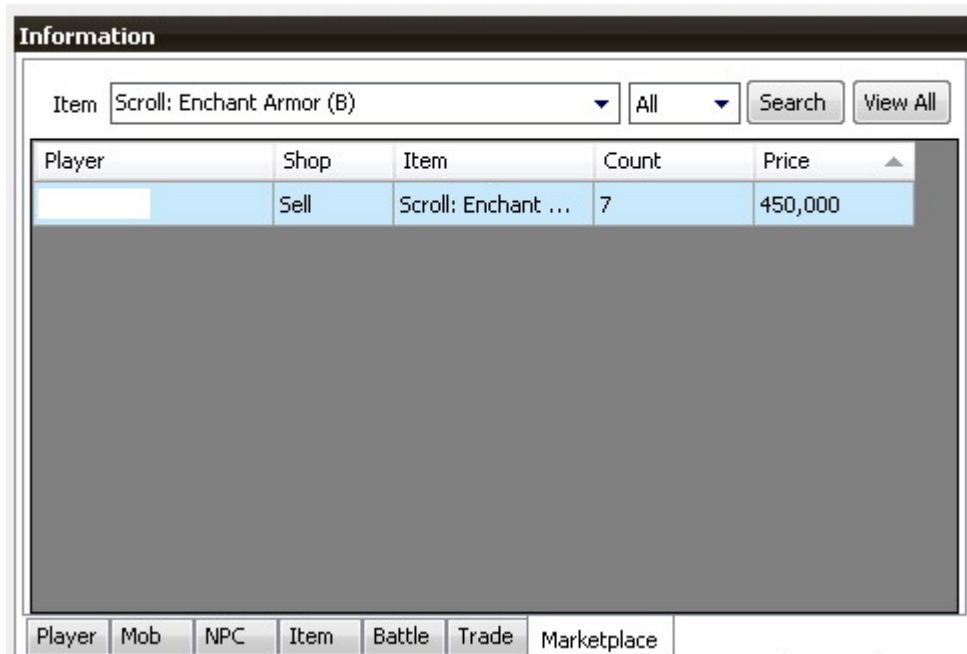

Marketplace stat gives you certain information include:

- Player store information: Allows you to see player store information nearby like player name, store type, store title, item, qty and price (Click on the name to see more information). Only store title will show at first time. Item name, quantity and price will show up after scan.
- Filter: Allows you to filter founded item.

Note! Double click on player name to move your character to player location.

4. Filter interest item by select item, store type and press “Search”.

The screenshot shows a window titled "Information" with a search interface. At the top, there is a dropdown menu for "Item" set to "Scroll: Enchant Armor (B)", a dropdown for "All", and buttons for "Search" and "View All". Below this is a table with the following data:

Player	Shop	Item	Count	Price
	Sell	Scroll: Enchant ...	7	450,000

At the bottom of the window, there is a navigation bar with tabs: "Player", "Mob", "NPC", "Item", "Battle", "Trade", and "Marketplace".

Search result will give you all item that founded from scan process include quantity and price. For instance, Figure above show all “Scroll: Enchant Armor (B)” in marketplace. Only one store sells it with 7 pieces at 450,000 adena. Use search result to compare best price to save your adena!

Note! To go back to marketplace, click on “View All”

## Auto Sell & Buy

Enable you to sell and buy item during marketplace scan.

- Type: Select trading type to sell or buy.
- Item: Item to sell or buy
- Qty: Item quantity
- Price: Item price.

For instance, your character will sell “Shining Arrow” to store that buy at price 1,000 or more. In other word, your character will buy “Animal skin” from store that sell at price 400 and below.

The screenshot shows a window titled 'Marketplace' with a sub-tab 'Auto Sell/Buy'. Inside the window, there is a checkbox labeled 'Include with marketplace scan' which is checked. Below this is a table with three columns: 'Type', 'Item', 'Qty', and 'Price'. The first row of the table is highlighted in blue and contains the following data: 'Sell', 'Shining Arrow', '500', and '1,000'. At the bottom of the window, there is a form with a dropdown menu set to 'Sell', a text box with 'Shining Arrow', a text box with '500', a text box with '1000', and two buttons labeled 'Add' and 'Del'.

Type	Item	Qty	Price
Sell	Shining Arrow	500	1,000

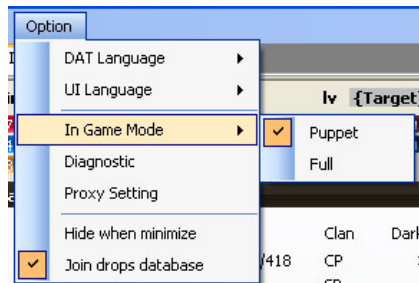

Sell ▼ Item Shining Arrow Qty 500 Price 1000 Add Del

## **Chapter 6: In game mode**

Enable you to use game client in automatic mode. L2Divine has 2 In Game modes:

- Puppet: Using OOG and IG together. Firstly, you need to create OOG account and as long as OOG still connected you can switch to IG anytime.
- Full: Using only game client normally.

To switch between IG mode, Go to Option > In Game mode

### Configuration (9.3.1 and later)

The way to configuration L2Divine 9.3.1 and later to support In Game mode:

#### Clean Hosts File

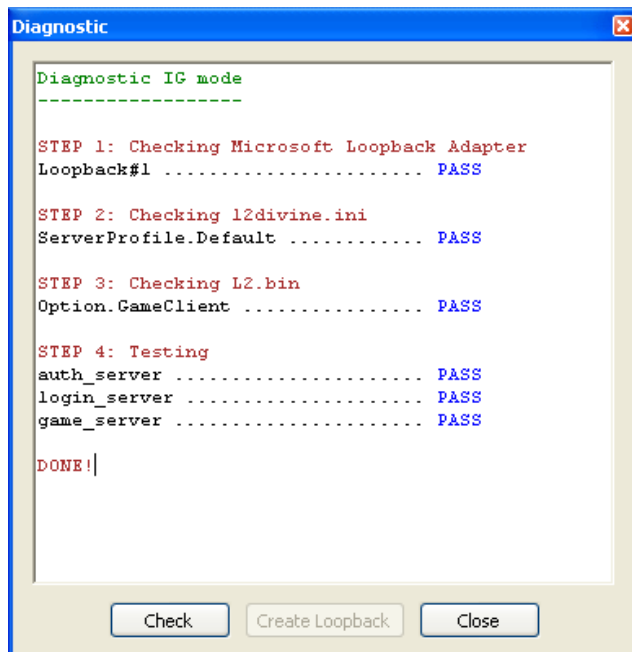

Remove anything related to Lineage2 in your hosts file.

```
# Copyright (c) 1993-2009 Microsoft Corp.
#
# This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
#
# This file contains the mappings of IP addresses to host names. Each
# entry should be kept on an individual line. The IP address should
# be placed in the first column followed by the corresponding host name.
# The IP address and the host name should be separated by at least one
# space.
#
# Additionally, comments (such as these) may be inserted on individual
# lines or following the machine name denoted by a '#' symbol.
#
# For example:
#
#       102.54.94.97       rhino.acme.com          # source server
#       38.25.63.10       x.acme.com              # x client host
#
# localhost name resolution is handled within DNS itself.
#       127.0.0.1         localhost
#       ::1               localhost
```

Note! Hosts file location for windows XP/Vista/7 is  
“C:\WINDOWS\system32\drivers\etc” and “C:\WINNT\system32\drivers\etc” for  
windows 2000.

## Installation

1. Firstly, you can check your current status of IG mode by use Diagnostic (Option > Diagnostic). Press “Check” and see result.

2. Go to Setting > Config:
  - Select your server profile
  - Check “Set as default profile”
  - Input login server IP
  - Locate your game client-L2.bin.

3. Create Microsoft Loopback with following IP address:

- IP : 61.90.252.1, Sub net mask : 255.255.255.252

Note! You can create Microsoft Loopback in Diagnostic screen or Read about adding Microsoft Loopback at Appendix A

## Configuration (9.1.0 and later)

The way to configuration L2Divine 9.1.0 and later to support In Game mode:

### Clean Hosts File

Remove anything related to Lineage2 in your hosts file.

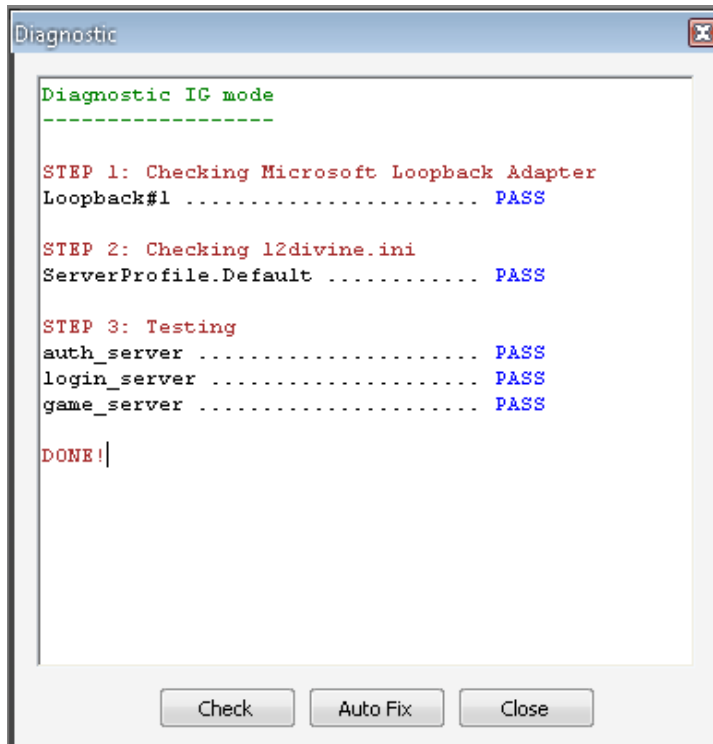

```
# Copyright (c) 1993-2009 Microsoft Corp.
#
# This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
#
# This file contains the mappings of IP addresses to host names. Each
# entry should be kept on an individual line. The IP address should
# be placed in the first column followed by the corresponding host name.
# The IP address and the host name should be separated by at least one
# space.
#
# Additionally, comments (such as these) may be inserted on individual
# lines or following the machine name denoted by a '#' symbol.
#
# For example:
#
#       102.54.94.97       rhino.acme.com           # source server
#       38.25.63.10       x.acme.com               # x client host
#
# localhost name resolution is handled within DNS itself.
#       127.0.0.1         localhost
#       ::1               localhost
```

Note! Hosts file location for windows XP/Vista/7 is

“C:\WINDOWS\system32\drivers\etc” and “C:\WINNT\system32\drivers\etc” for windows 2000.

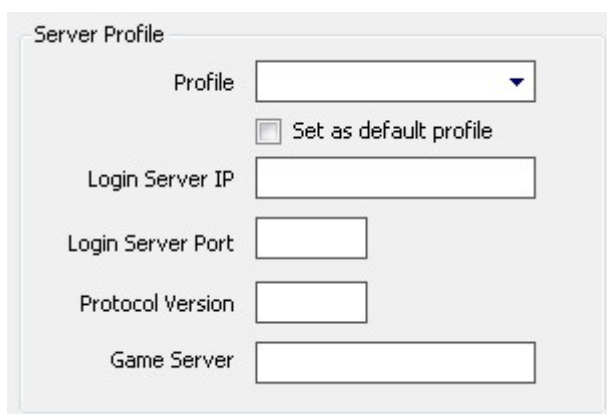

## Automatic installation

Go to Option > Diagnostic and press “Auto Fix”. L2Divine will automatic create required component that need to run IG mode for you. You probably diagnose your IG problem by press “Check”. If everything OK, you should see every step done with PASS.

## Manual installation

4. Edit login information (Setting > Config):
  - Select your server profile
  - Check “Set as default profile”
  - Input login server IP

5. Create Microsoft Loopback with following IP address:
  - IP : 61.90.252.1, Sub net mask : 255.255.255.252

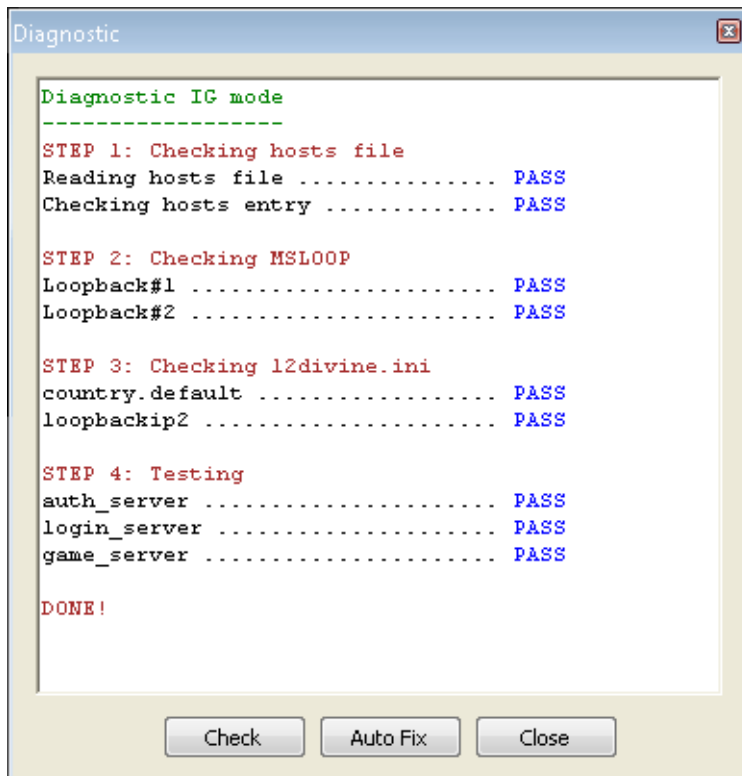

Note! Read about adding Microsoft Loopback at Appendix A

## Configuration (9.0.8 and below)

The way to configuration L2Divine 9.0.8 and below to support In Game mode:

### Automatic installation

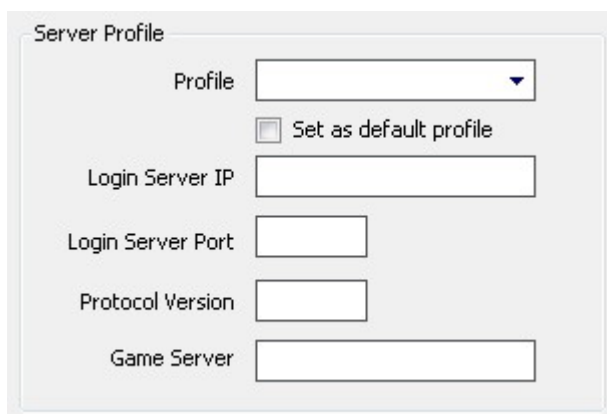

Go to Option > Diagnostic and press “Auto Fix”. L2Divine will automatic create required component that need to run IG mode for you. You probably diagnose your IG problem by press “Check”. If everything OK, you should see every step done with PASS.

### Manual installation

6. Edit login information (Setting > Config):

- Select your server profile
- Check “Set as default profile”
- Input login server IP

7. Create 2 Microsoft Loopback with following IP address:

- IP1 : 61.90.252.1, Sub net mask : 255.255.255.252
- IP2 : 61.90.252.2, Sub net mask : 255.255.255.252

Note! Read about adding Microsoft Loopback at Appendix A

8. Add your host name and IP1 to your Hosts file

- 61.90.252.1      YourHostName

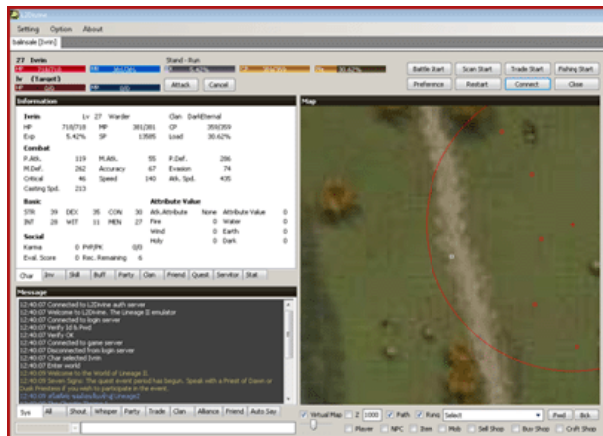

Note! Hosts file location for windows XP/Vista is "C:\WINDOWS\system32\drivers\etc" and "C:\WINNT\system32\drivers\etc" for windows 2000.

9. Update IP2 to "loopbackip2" in section "Option" of l2divine.ini

```
[Option]
lang=e
hide=0
ig=2
priority=Normal
loopbackip2=61.90.252.2
```

## Starting Puppet mode

1. Create OOG account

2. Open game client with "Setting > Launch Game Client" and login with any ID and PWD

3. Select server Tor, Farris or Hunter (Tor is virtual server created by L2Divine. It doesn't exist on retail.)

4. Select current OOG character

5. Press “End” to open “Preference window” and “Home” to toggle in battle mode. Additional information (Level, HP) will show when selected target.

## Starting Full mode

1. Open L2Divine

2. Start game with "Setting > Launch Game Client", input ID and PWD, select server and character.

6. L2Divine account will pop up during game loading. After loading complete, Press "End" to open "Preference window" and "Home" to toggle in battle mode. Additional information (Level, HP) will show when selected target.

## Chapter 7: Tip & Trick

## Change battle area using path point (Leader only)

1. Go to Combat > Condition > Fight and check on “Change hunting area”.

When not found mob (Leader Only)

☐ Wait ☐ Sit ☒ Change hunting area ☐ Back to center

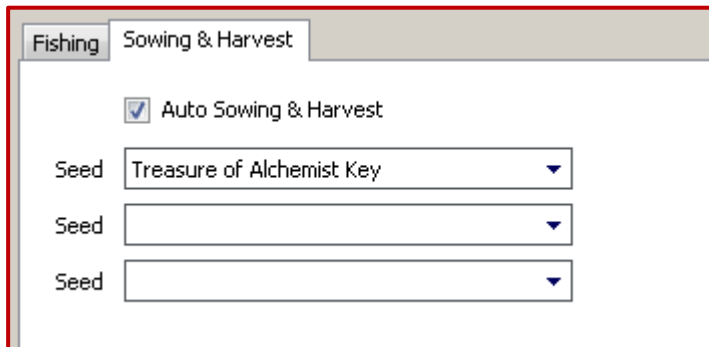

2. Make multiple hunting areas. Provide location and 0 for radius to make path point (Show as white line in map). Every point will connect each other as path.

Hunting Area					
	x	y	z	Radius	
	-21,505	122,510	-3,480	3,000	
	-23,991	121,641	-3,648	0	

## Open treasure chest

1. Go to Mini Game > Sowing & Harvest, check on “Auto Sowing & Harvest” and select key item to use in battle.

The screenshot shows the 'Sowing & Harvest' mini-game interface. The 'Fishing' tab is selected. The 'Auto Sowing & Harvest' checkbox is checked. The 'Seed' dropdown menu is set to 'Treasure of Alchemist Key'.

2. Go to Combat > Mob and checking on “Seed” to “Treasure Chest” mob.

Name	LV	Title	Attack	Seed	Spoil	High Priority	Shot
Treasure Chest	52		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Treasure Chest	52		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Treasure Chest	52		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Treasure Chest	52		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Treasure Chest	52		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

## Down Level

- Go to Combat > Condition > Fight.
  - Check on "I'm combat leader"
  - Change battle mode to "Siege"
  - Check on "Change hunting area"

**Fight** | Area | Logout | Misc

☒ I'm combat leader      Battle Mode: Siege

☐ Battle after login      ☐ Fight delay: 0 sec

☒ Timeout: 5 sec      ☒ Loot Item & Mob

☒ Auto attack aggressive mob      ☒ Sweep & Sow before attack

☐ Auto counter attack      ☐ Attack unknown mob

☒ Pickup item range: 500      ☒ Pickup item before attack

☐ Pickup only my item      ☐ Pickup unknown item

☐ Change to nearest target      ☒ Change target when other player select mob

☐ Accept revive from other player      ☒ Auto attack high priority mob

**Resting**

Sit when ☒ HP < 30 %      ☒ MP < 30 %      ☐ Use relax skill

Stand when ☒ HP > 100 %      ☒ MP > 100 %

**When not found mob (Leader Only)**

☐ Wait      ☐ Sit      ☒ Change hunting area      ☐ Back to center

- Go to Combat > Condition > Area.
  - Make hunting area surround target NPC.
  - Make path point that pass through every spawn location. (Depend on each town)

**Area** | Fight | Logout | Misc

**Hunting Area**

	x	y	z	Radius
●	-14,401	122,644	-3,112	0
●	-14,329	123,668	-3,112	0
●	-12,626	123,672	-3,112	0
●	-11,796	123,688	-3,112	0
●	-11,826	123,528	-3,112	150

●     My Loc Radius 150 Add Edit Del

3. Go to Combat > Condition > Misc
  - Checking on “Die return to Village” and input time to return.
  - Checking on “Stop battle when level =” and input level that you want to down to.

<input checked="" type="checkbox"/>	Die return to	Village	in	5	sec
<input checked="" type="checkbox"/>	Stop battle when LV reach	18			

4. Input “Normal Attack” in attack command to make your character able to hit on NPC.

## Summon Friend (Summoner Only)

1. Invite target to join party by “/invite name”

2. Select target by “/target name” or double-click on member in party window.

3. Use skill “Summon Friend”

## Chapter 8: Script

## Writing a Script

The easiest way to write a simple script is with a text editor. So, using the text editor of your choice, create a text file with the following text. DivineScript are case sensitive, so if you type the code in yourself, pay particular attention to the capitalization. See Appendix B for command reference

Example

```
// A Very Simple Example  
Msg(Console, "Hello Divine")
```

To run this script, Save above script to file and clicking on “Run Script” button then select it and confirm on dialog.

## Code Comments

Double slashes or // is code comments. It's placed in source files to describe what is happening in the code to comment-out lines of code to isolate the source of execution.

## Compare Operator

You can use operators to compare value in If and While command. Divine supported for operator below

==	Equal
!=	Not equal
>	Greater than
<	Lower than
>=	Equal or greater than
<=	Equal or lower than
!	Not

Example

```
// Use potion when HP fall below 50%  
If (Char.HP% < 50)  
{  
    UseItem("Potion")  
}
```

## Syntax

### Case sensitive

Valid syntax

```
Msg(Console, "Hello Divine")
```

Invalid Syntax

```
MSG(Console, "Hello Divine")  
mSG(Console, "Hello Divine")
```

## One command per line

Valid syntax

```
if (CountItem("Iron Ore") > 0)
{
}
```

Invalid Syntax

```
if (CountItem("Iron Ore") > 0) {
}
```

## Complete start and end scope

Valid syntax

```
while (Char.HP > 500)
{
}
```

Invalid Syntax

```
while (Char.HP > 500)
}
```

## Represent string with ""

Valid syntax

```
Msg(Console, "Hello Divine")
```

Invalid Syntax

```
Msg(Console, Hello Divine)
```

## Global Property

You can use following properties to represent your status

<i>Char.HP</i>	Represent HP
<i>Char.HP%</i>	Represent HP percentage
<i>Char.MP</i>	Represent MP
<i>Char.MP%</i>	Represent MP percentage
<i>Char.CP</i>	Represent CP
<i>Char.CP%</i>	Represent CP percentage
<i>Char.Soul</i>	Represent soul (Kamael only)
<i>Char.LV</i>	Represent level
<i>Char.Load%</i>	Represent weight percentage
<i>Char.InParty</i>	Represent your party status
<i>Char.Vitality</i>	Represent vitality
<i>Target.HP</i>	Represent Target HP
<i>Target.HP%</i>	Represent Target HP percentage
<i>Target.MP</i>	Represent Target MP
<i>Target.MP%</i>	Represent Target MP percentage

### Including other script

You can insert the content of one script file into another script file, with the Include command.

Example – main.txt

```
Include("mylib.txt")  
Msg(Console, "Hello 1")  
Msg(Console, "Hello 2")
```

Example - mylib.txt

```
Msg(Console, "MyLib -> Hello 1")  
Msg(Console, "MyLib -> Hello 2")
```

Note! The specified script must be in the same directory with the file that uses the command.

## **Appendix A: Adding Microsoft Loopback**

1. Go to > Start > Setting > Control Panel > Add Hardware

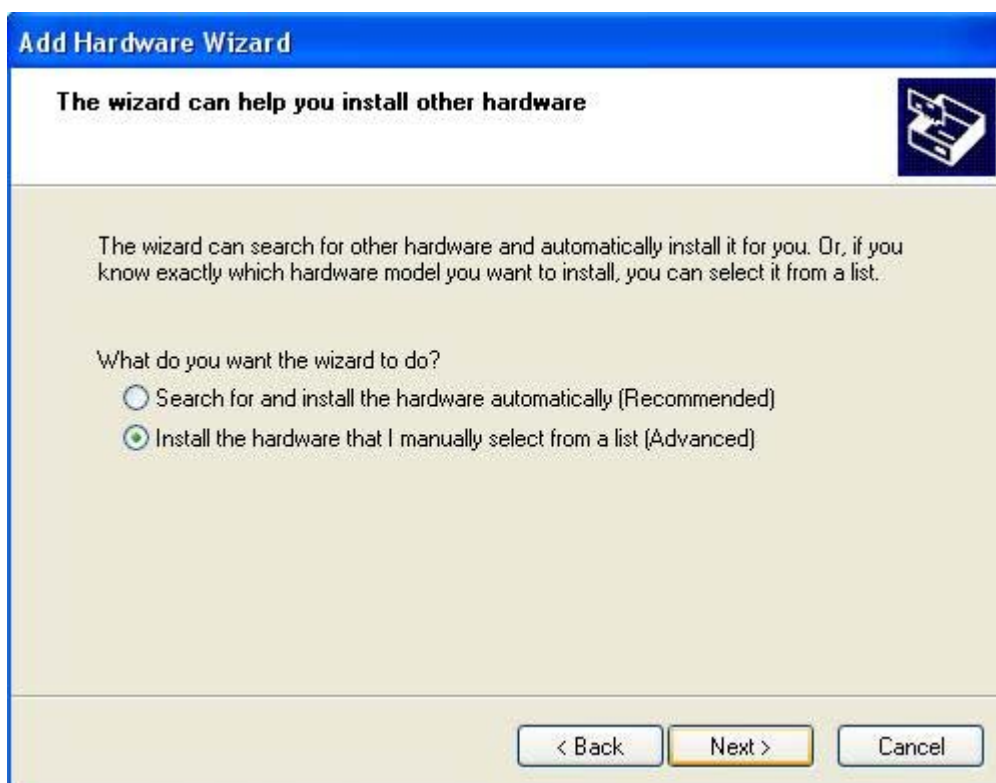

2. Select "Yes, I have ..."

3. Scroll down to last line and select "Add a new hardware device"

4. Select "Install the hardware ..."

5. Select "Network Adapters"

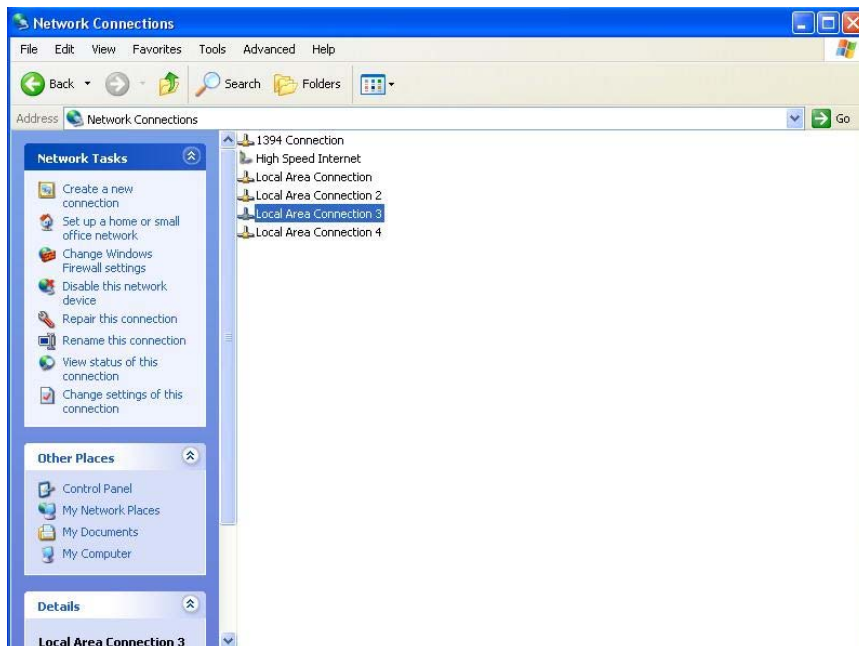

6. Select “Microsoft” and “Microsoft Loopback Adapter”

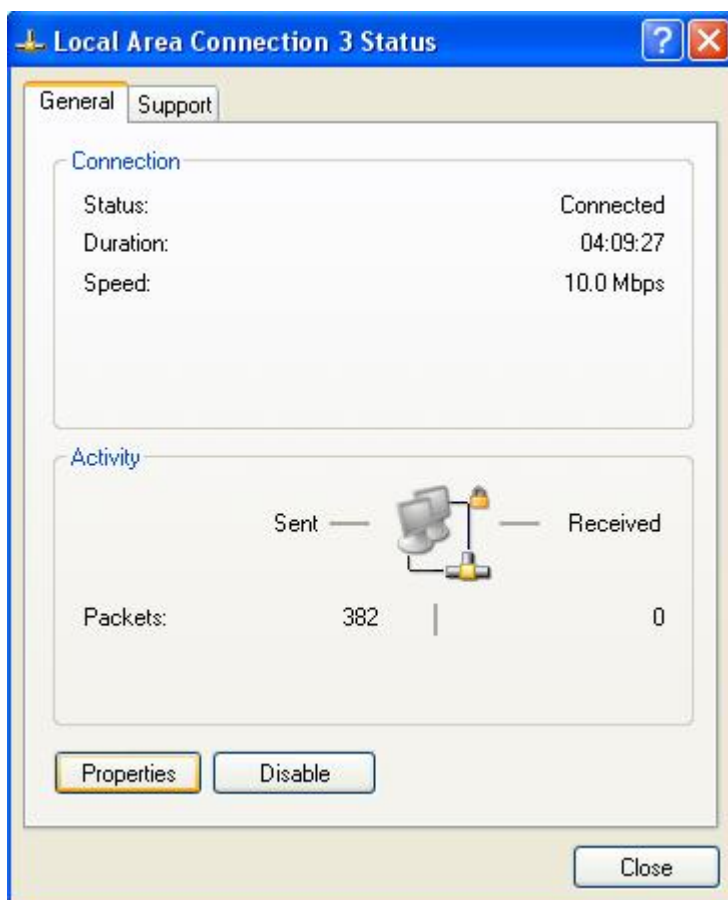

7. Press next until finish

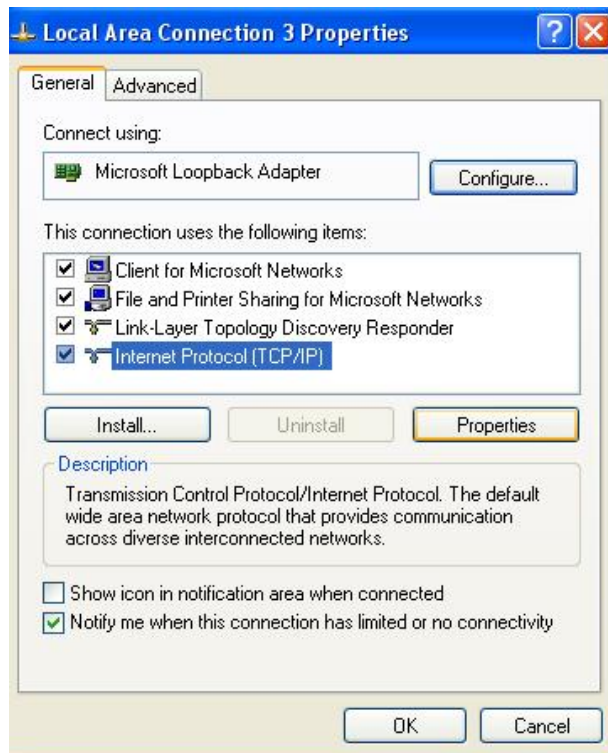

8. Go to > Start > Setting > Control Panel > Network Connection and select last Local Area Network

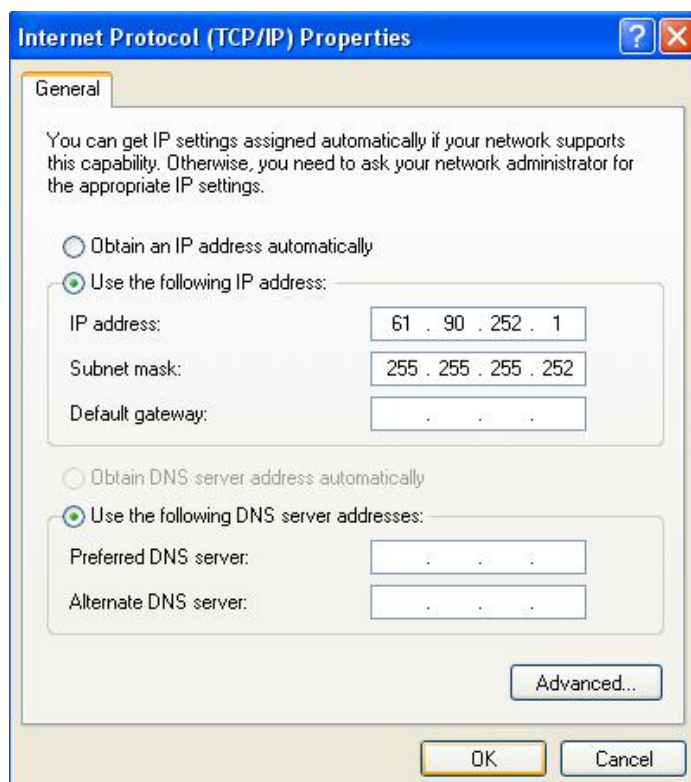

9. Select "Properties"

10. Select "Internet Protocol (TCP/IP)" then select "Properties"

11. Select “Use the following IP address” and input IP and Subnet mask.

## **Appendix B: Script command reference**

### **AddHuntingArea(x, y, z, radius)**

Parameter      Location (x,y,z) and radius  
Return          None  
Propose        Add hunting area to current setting  
Example        [\*AddHuntingArea\(115968, -174345, -760, 2500\)\*](#)

### **AddRectHuntingArea(x, y, z, radius)**

Parameter      Location (x,y,z) and radius  
Return          None  
Propose        Add hunting area (rectangle) to current setting  
Example        [\*AddRectHuntingArea\(115968, -174345, -760, 2500\)\*](#)

### **AddItem(Item ID, Count), AddItem(Item Name, Count)**

Parameter      Item ID or Item Name, Quantity (Use \* for all)  
Return          None  
Propose        Add item to buy, sell, withdraw and deposit list of opening trade dialog.  
Example        [\*AddItem\("Scroll of Escape", 1\)\*](#)  
                  [\*AddItem\(17, \\*\)\*](#)

### **BattleStart()**

Parameter      None  
Return          None  
Propose        Activate character in battle mode (Same as press "Battle Start" button)

### **BattleStop()**

Parameter      None  
Return          None  
Propose        Deactivate character from battle mode (Same as press "Battle Stop" button)

### **BuffLevel(Skill ID), BuffLevel(Skill Name)**

Parameter      Skill ID or Skill Name  
Return          Level of skill affected  
Propose        Get level of skill effected (Use with If and While command)

### **ClearHuntingArea()**

Parameter      None  
Return          None  
Propose        Remove all hunting area from current setting

### **CloseDialog()**

Parameter      None  
Return          None  
Propose        Close opening NPC dialog

### Confirm()

Parameter	None
Return	None
Propose	Confirm buy, sell, withdraw and deposit item with NPC
Example	<pre>// Talk with Mr.CAT NPCDialog(31756) Delay(2000)  // Select link no. 6, 1 to buy item SelectDialog(6) Delay(2000) SelectDialog(1) Delay(2000)  // Add Crystal D-Grade x 3 to trade list AddItem(1458, 3)  // Confirm trade Confirm()  // Close opening dialog CloseDialog()</pre>

### CountItem(Item ID), CountItem(Item Name)

Parameter	Item ID or Item Name
Return	Total quantity of item
Propose	Count item in inventory (Use with If and While command)
Example	<pre>// Count no of Soulshot: D Grade While (CountItem(1463) &lt; 1000) {     // Do something }</pre>

### CraftItem(Receipt ID)

Parameter	Receipt ID
Return	None
Propose	Manufacturing item
Example	<pre>// Create Soulshot: D Grade CraftItem(20)</pre>

### CrystalizeItem(Item ID), CrystalizeItem(Item Name)

Parameter	Item ID or Item name
Return	None
Propose	Crystallize item

### **Delay(Millisecond)**

Parameter	Time in millisecond
Return	None
Propose	Pause script execution

### **DestroyItem(Item ID, count), DestroyItem(Item Name, count)**

Parameter	Item ID/Name and count
Return	None
Propose	Destroy item

### **DialogContain(text)**

Parameter	Text
Return	True/False
Propose	Check opening dialog contain whether specific text or not (Use with If and While command)
Example	<pre>If (DialogContain("2.4 km")) {     SelectDialog("2.4 km")     Return }</pre>

### **Dismiss(Name)**

Parameter	Player name
Return	None
Propose	Dismiss player from party

### **DropItem(Item ID, count), DropItem(Item Name, count)**

Parameter	Item ID/Name and count
Return	None
Propose	Drop item at current location

### **EnchantItem(Item ID, Item ID)**

Parameter	Weapon or Armor ID, Enchant Scroll ID
Return	None
Propose	Enchant weapon and armor with specific enchant scroll
Example	See@Enchant Item.txt

### **EnchantLevel(Item ID)**

Parameter	Item ID
Return	Level of enchantment
Propose	Get enchant level of specific item ID (Use with If and While command)

### **Exit**

Parameter	None
Return	None
Propose	Exit script

### **FishingStart()**

Parameter	None
-----------	------

Return	None
Propose	Active character in fishing mode (Same as press "Fishing Start" button)

### **FishingStop()**

Parameter	None
Return	None
Propose	Deactivate character from fishing mode (Same as press "Fishing Stop" button)

### **ForceAttack(NPC ID), ForceAttack(NPC Name)**

Parameter	NPC ID or NPC Name
Return	None
Propose	Force attack to NPC
Example	<i>Down Level:</i>

```
// Attack until die
While (Char.HP > 0)
{
    ForceAttack(30545)
    Delay(2000)
}

// Return to nearest village
ReturnToVillage()
Delay(2000)
// Down level until 25
If (Char.LV > 25)
{
    Jump("Down Level")
}
```

### **If () {} Else {}**

Parameter	Global property/function, comparator and value
Return	True/False
Propose	Compare your statement
Example	<i>If (CountItem(1835) == 0)</i>

```
{
    // Select list no. 1 to buy item
    SelectDialog(1)
}
Else
{
    // Sell list no. 3 to sell item
    SelectDialog(3)
}
```

### **Include(filename)**

Parameter	filename
Return	None
Propose	Include other script file

### Invite(Name)

Parameter	Player name
Return	None
Propose	Invite target to join party
Example	Invite("dev")

### IsMember(Name)

Parameter	Player name
Return	True/False
Propose	Check player whether in party or not
Example	<pre>If (IsMember("dev")) {     Msg(Console, "dev joined party") } Else {     Msg(Console, "dev not in party") }</pre>

### Jump(Label)

Parameter	Address label
Return	None
Propose	Jump to specified label

### Label:

Parameter	None
Return	None
Propose	Define address
Example	<i>MY_PROC:</i>

### LeaveParty()

Parameter	None
Return	None
Propose	Leave from party

### LocInRange(x, y, z, radius)

Parameter	location (x, y, z) and radius
Return	True/False
Propose	Check location whether in specified circle area or not (Use with If and While command)
Example	<pre>If (LocInRange(-59569, -56184, -2032, 500)) {     Msg(Console, "In range") } Else {     Msg(Console, "Not in range") }</pre>

### Logout(Delay, Relogin Delay)

Parameter	Logout delay time and relogin delay time (In second)
Return	None
Propose	Force logout and relogin
Example	<i>// Logout now and relogin in next 10 second</i> <i>Logout(0, 10)</i>

### MoveTo(x, y, z)

Parameter	location (x, y, z)
Return	None
Propose	Move your character to specified location. Use /loc command to get your current location.
Example	<i>// Move to black wolf spawn location</i> <i>MoveTo(116633, -183771, -1568)</i> <i>MoveTo(116504, -183755, -1560)</i> <i>MoveTo(116548, -184397, -1568)</i> <i>MoveTo(116633, -185163, -1744)</i> <i>MoveTo(117115, -186064, -2088)</i> <i>MoveTo(117678, -186667, -2384)</i> <i>MoveTo(118566, -187339, -2776)</i> <i>MoveTo(119119, -188103, -3096)</i> <i>MoveTo(119674, -188351, -3264)</i> <i>MoveTo(120054, -187729, -3304)</i> <i>MoveTo(119537, -186438, -3248)</i>

### Msg(Output, Message), Msg(Output, Message, Target)

Parameter	Output and message. Following are output type.	
	<i>Console</i>	Represent console message (Use internal in Divine)
	<i>General</i>	Represent general message
	<i>Shout</i>	Represent shout message
	<i>Trade</i>	Represent trade message
	<i>Party</i>	Represent party message
	<i>Clan</i>	Represent clan message
	<i>Ally</i>	Represent ally message
	<i>Friend</i>	Represent friend message (Target required)
	<i>Whisper</i>	Represent whisper message (Target required)
Return	None	
Propose	Send message to target	
Example	<i>Msg(General, "Hello")</i> <i>Msg(Whisper, "Hello", "Dev")</i>	

### **NpcDialog(NPC ID), NpcDialog(NPC Name)**

Parameter	NPC ID or NPC name
Return	None
Propose	Open NPC dialog
Example	See@Revenge of the Redbonnet.txt

### **Return**

Parameter	None
Return	None
Propose	Return to next command of called Jump
Example	<i>Jump("Start")</i>

```
MyProc1:  
Msg(Console, "Proc1 Command 1")  
Return
```

```
MyProc2:  
Msg(Console, "Proc2 Command 1")  
Msg(Console, "Proc2 Command 2")  
Return
```

```
Start:  
Msg(Console, "Command 1")  
Jump("MyProc1")  
Msg(Console, "Command 2")  
Jump("MyProc2")  
Msg(Console, "Command 3")
```

### **ReturnToVillage()**

Parameter	None
Return	None
Propose	Return to nearest village after die
Example	See@Down Level.txt

### **ReturnToClanHall()**

Parameter	None
Return	None
Propose	Return to clan hall after die
Example	

### **SelectDialog(Link Name), SelectDialog(Link Index)**

Parameter	Link name or Link index
Return	None
Propose	Select link from opening NPC dialog
Example	

### SelectTarget(Name), SelectTarget(NPC ID)

Parameter	Player name, NPC ID or name
Return	None
Propose	Target on Player/NPC/Mob (Synonym "Me" for your character)
Example	<pre>// Buff myself SelectTarget("Me") UseSkill(1059) UseSkill(1068) UseSkill(1077) UseSkill(1040) UseSkill(1204)</pre>

### SetBattleArea(x, y, z, radius)

Parameter	Location and radius
Return	None
Propose	Set battle area to current setting
Example	<pre>SetBattleArea(115968, -174345, -760, 2500)</pre>

### SetRestArea(x, y, z)

Parameter	Location
Return	None
Propose	Set rest area to current setting
Example	<pre>SetRestArea(115968, -174345, -760)</pre>

### Sit()

Parameter	None
Return	None
Propose	Set character to sit
Example	

### Stand()

Parameter	None
Return	None
Propose	Set character to stand

### TargetInRange(Name), TargetInRange(NPC ID)

Parameter	Name or NPC ID
Return	True/False
Propose	Check player/NPC whether in range or not (Use with If and While command)
Example	<pre>If (TargetInRange(32378)) {     Msg(Console, "Found") } Else {     Msg(Console, "Not Found") }</pre>

### TradeStart()

Parameter	None
Return	None
Propose	Activate character in trading mode (Same as press "Trade Start" button)
Example	See@Craft Item.txt

### TradeStop()

Parameter	None
Return	None
